EDUCATION

Bachelor of Economics | September 2016 – May 2021

- Minor in Computer Science where I took 12 courses.
- Captain of the track and field team.

EXPERIENCE

SafeCode | Junior Software Developer full stack| April 2022 – Present | Melbourne, VIC

- Experience in both front-end and back-end technologies such as HTML/CSS/SCSS, C# and JavaScript, as well as some exposure to SQL.
- Developed .NET Web REST API and services using EF Core.
- Frameworks: Entity Framework, Blazor and Angular
- Unit testing on API endpoints.

SalaryPackagingPlus | Customer Service Officer | February 2022 – April 2022 |Melbourne, VIC

- Performed financial and administrative tasks.
- Replied to customer questions and complaints through emails and phone calls.

YMCA Calgary | Duty Manager | August 2021 – January 2022 | Calgary, Alberta

- Ensured smooth operation of the world's largest YMCA during strenuous times such as swim meets and COVID-19 protests.
- Consistently dealt with difficult customers calmly and logically to ensure customer satisfaction.
- A first responder to all first aid situations in the facility, including those involving ambulances and the fire department.

KG Properties | Assistant Property Management | November 2014 – January 2022| Calgary, Alberta

- Held showings of rental properties for future tenants.
- Performed maintenance of properties, including painting, drywalling, and showing the rentals.

Mount Royal University Kids | Camp Leader | May 2019 -August 2019 | Calgary, Alberta

- Managed large groups of children ranging from 20-30 in size.
- Made accommodations for kids unfamiliar with English and/or learning difficulties.

Foundation Building Materials | Customer Service | May 2016 – 2019

- In charge of operating heavy machinery such as forklift and drywall delivery trucks.
- Oversaw the operation of a stucco tinting facility where we would exceed the expectations set out for us daily.
- Received and filled out advanced orders from customers to complete and deliver on time.

SKILLS

- Have worked with C#, Java, JavaScript.
- Visual Studio, Visual Studio Code, and Microsoft SQL server.
- Used the following frameworks: Blazor, EF Core, React, .NET API.
- I am currently learning the REACT and C# to create my own personal apps.
